

Amex Sanivar Establishes Local U.S. Presence and Appoints Industry Expert John Moody as Managing Director

Summerville, South Carolina – September 02, 2026 – Amex Sanivar is strengthening its presence in the North American trenchless rehabilitation market with the establishment of a local U.S. company, **Amex Sanivar USA**. As part of this expansion, **John Moody has been appointed as Managing Director**, bringing more than 20 years of experience in pressure pipe rehabilitation and trenchless technologies to the organization.

The establishment of Amex Sanivar USA marks an important step in the company's commitment to its customers in the United States. By establishing a local presence, Amex Sanivar aims to provide customers with closer access to technical expertise, local support, and responsive service while introducing and developing its pressure pipe rehabilitation solutions in the North American market. The company also plans to establish local stock of selected products in the U.S., further improving availability and enabling faster response times for customers.

Amex Sanivar offers trenchless rehabilitation solutions for pressure pipelines, including technologies designed to rehabilitate pipelines efficiently while minimizing disruption to surrounding infrastructure. With its combination of engineering expertise, proven technologies, and a strong focus on practical project requirements, the company sees significant potential in the U.S. market.

“Establishing a local presence in the United States is an important milestone for Amex Sanivar,” said Dr. Oliver Terhoeven, CEO Amex Sanivar. “Our goal is to be closer to our customers, understand their specific project requirements, and provide the technical and practical support they need locally. With John joining us, we are taking an important step toward building a strong and sustainable presence in the North American market.”

Experienced leadership for the U.S. market

John Moody brings more than two decades of experience in the trenchless rehabilitation industry, with a particular focus on pressure pipe rehabilitation, business development, and technical market engagement. Throughout his career, he has worked closely with municipalities, engineers, contractors, and industry partners across North America and has played an important role in introducing and developing innovative trenchless technologies in the market.

“I’m excited to join Amex Sanivar at this important stage of its U.S. expansion,” said Moody. “The company brings strong engineering expertise and proven rehabilitation technologies to a market with significant infrastructure needs. My focus will be on building strong relationships locally and making sure customers have access to the right technology, technical expertise, and support throughout their projects.”

Part of IMS Trenchless USA

As part of IMS Trenchless USA, Amex Sanivar USA will work closely with Craig Underwood and the wider IMS Trenchless organization to establish a strong local

presence and provide customers with comprehensive expertise and support across the trenchless rehabilitation market.

“Our priority is simple: to make it easier for customers in the U.S. to access our technologies and the expertise behind them,” Moody added. “Being locally present allows us to respond faster and work together with our customers to find the best solution for each project. We’re here to raise standards, deliver reliability, and earn our place through performance.”

Amex Sanivar USA — European technology. Local expertise. Closer to our customers.
